Remote Collaboration Invitation Letter for Arpita Kumari

Dear Arpita Kumari,

I am pleased to write this letter and invite Arpita Kumari to join my laboratory, the CREATE Lab (Computational Robot Design & Fabrication Lab), at the École Polytechnique Fédérale de Lausanne (EPFL, Lausanne, Switzerland) as a remote collaborator between the dates 23rd March to 15th May 2026.

As discussed, your research will focus on the 3D design and rapid prototyping for the Open Parametric Hand (OPH) project. This collaboration will prioritize CAD model optimization and the development of modular hardware architectures for robotic prosthetics. In the eight weeks of the project, two prototype iterations will be produced towards prosthetic robot hand applications.

Over the duration of the project, my research group and I will help and support you in your research work with remote supervision and resources for production of the current OPH hardware platform. Please find my contact information below in case any further technical coordination or administrative assistance is necessary regarding this collaboration.

Josie Hughes (Assistant Professor, CREATE Lab, EPFL)
