To Whom It May Concern

I am writing to wholeheartedly recommend **Ms. Arpita Kumari**, a bright and diligent student from KIET Group of Institutions, Ghaziabad, Uttar Pradesh, for any future academic or professional opportunity she may pursue.

I first came in contact with Arpita in September 2024, when she participated in **MEDHA 2024**, a Medical Device Hackathon organized by BETIC, IIT Bombay. Her outstanding performance in the event led her to secure a position in our prestigious Medical Device Innovation Course (**MEDIC 2024**). During the course, she demonstrated her dedication, attending every session attentively and actively engaging with the faculty and mentors. For her final project, she developed an innovative medical device for back pain prevention and relief, which she later presented to professors and investors at IIT Bombay on October 26, 2024.

Despite our Summer Internship applications being closed, Arpita expressed a keen interest in contributing to ongoing projects at BETIC. Impressed by her track record, I made an exception and welcomed her to join us as a Summer Intern in 2025. Looking back, I am very glad I did.

Over the course of 8 weeks, Arpita worked on two demanding and highly impactful projects – an **Automatic Blood Smearing Device** for the diagnosis of sickle cell anemia, and a **Dental Intraoral Scanner**. I recall one instance where she had to identify and recommend a suitable motor for the Smear device. She quickly acquired all the necessary technical knowledge and selected the most appropriate motor for our needs. Her grasp of electronic components and microcontrollers is particularly strong. She is self-driven, highly motivated, and consistently demonstrates the ability to work independently with minimal guidance.

It was truly a pleasure to mentor and interact with Arpita. I firmly believe she has the potential to do outstanding work in any endeavour she undertakes and to contribute meaningfully to her field. I am confident she will be a valuable asset to any academic institution or organization.

I strongly recommend her in the highest terms. Please feel free to contact me for any further information.

Regards,
